Summary

Software Engineer with 2+ years of experience in full-stack development and system architecture, specializing in **backend systems**, REST APIs, and distributed data processing pipelines using **Java, Spring Boot, Angular, and PostgreSQL**. Hands-on experience with cloud infrastructure and **GenAI workflows**, including applied work in system performance optimization. Seeking to deepen expertise in distributed systems and computer engineering through **graduate study**.

Education

G. H. Patel College of Engineering and Technology
Bachelor of Engineering in Information Technology | Overall CPI: 9.07/10.0

Anand, India
Sept 2020 - June 2024

- Relevant Coursework: Basics of Electrical & Electronics Engineering, Digital Fundamentals, Operating System, DBMS, Computer Organization & Architecture, Computer Networks, Internet of Things, Information & Network Security, Probability – Statistics & Numerical Methods

Technical Skills

- Languages: Java, JavaScript, C++, SQL
- Backend: Spring Boot, Node.js, Express.js, ASP.NET MVC, REST APIs
- Frontend & Mobile: Angular, React Native
- Databases & Distributed Systems: MySQL, PostgreSQL, MongoDB, Redis, RabbitMQ
- Cloud & Infrastructure: AWS (EC2, S3, ELB, Auto Scaling, IAM, RDS)
- AI / GenAI: RAG, LLMs, LLM Guardrails, AI Workflows
- System Design & Data: System Architecture, Data Modeling, Data Processing Pipelines

Experience

Tata Consultancy Services
Systems Engineer

Ahmedabad
Nov 2024 - Present

Confidential Government/Defense Project

[Project: Mar 2026 - Present]

- Designed the application architecture, backend modules, and PostgreSQL database architecture for an enterprise project and material management platform supporting project planning, activity execution, and project monitoring.
- Engineered Spring Boot REST APIs and Angular modules for role-based workflows and management dashboards, implementing project planning, task tracking, team workload monitoring, and project visualization capabilities.
- Led a **15+ member** frontend and backend engineering team and delivered **60+ screens within a 4-month deadline**, driving technical task allocation, code reviews, frontend-backend integration, feature development, and delivery coordination.

PETRONAS & Inland Waterways Authority of India — Enterprise Project Management Platform PoC

[Project: Jun 2026 - Jul 2026]

- Developed an enterprise project management PoC covering project planning, role-based workflows, and project monitoring using Spring Boot and Angular.
- Built REST APIs, data models, and role-based dashboards with automated project metrics for tracking project progress, task status, and overall project health.

Board of Control for Cricket in India — Sports Analytics PoC

[Project: Mar 2026 - Apr 2026]

- Engineered data processing pipelines to ingest and standardize data from stadium IoT systems, merchandise platforms, and ticketing applications, developing flattened data models for analytics and reporting.
- Implemented **Redis**-based API caching for improved API performance.

ICAI - Institute of Chartered Accountants of India

[Project: Jan 2026 - Feb 2026]

- Enabled remote certification for Chartered Accountants (Post-Qualification) by integrating **Zoom APIs** into ICAI's learning platform.

Tata Play Fiber

[Project: Nov 2024 - Dec 2025]

- Developed Spring Boot REST APIs and Angular components for back-office operations including inventory management, purchase orders, material balance tracking, and vendor invoice management.

Tatvasoft
Trainee Software Engineer

Ahmedabad
Jan 2024 - Oct 2024

DoPay (Japan-based Cryptocurrency Platform) -

- Developed **Node.js REST APIs** for wallet transactions, market orders, and account management.
- Implemented **RabbitMQ** to improve transaction-processing reliability and address concurrency issues.
- Contributed to backend development of a cryptocurrency trading platform supporting Bitcoin, XRP, and Ethereum trading operations.

The Karmic Universe
Backend Developer Intern

Remote

- Finosauras (now Saras) -**
- Developed schedulers to fetch live stock market data for real-time analytics.
 - Integrated Upstox APIs for real-time market data retrieval and processing.
 - Implemented GPT based stock price prediction workflows.
 - Reduced API response time from **800ms to 100ms** using Redis caching.

Key Projects

- AI-Driven Performance Testing & Optimization Platform | GitHub**
- Developed an AI-driven platform that analyzes application telemetry, logs, metrics, traces, and historical load-test data to understand application behavior and automatically generate realistic performance-testing scenarios.
 - Engineered AI agents to generate JMeter/k6 test scripts, automatically create test data and assertions, orchestrate load-test execution, and collect live performance metrics.
 - Implemented AI-powered bottleneck detection and root cause analysis by correlating application metrics, logs, traces, and historical test results across CPU, memory, database, API, and network layers.
 - Built a RAG-powered optimization agent providing explainable recommendations for JVM tuning, SQL optimization, caching, Kubernetes, and scaling, surfaced through an interactive performance analytics dashboard.

- Sachivalay Canteen (Gujarat Government Project) | GitHub -**
- Developed an application to digitize canteen operations and meal ordering for **Gujarat Sachivalay employees**.
 - Led the development using React Native for the user application and hosted backend server on AWS EC2.

- Imaze App (College Tech-Fest Platform) | GitHub -**
- Led end-to-end development and deployment of a React Native application for a college tech fest.
 - Managed a team of 4 developers and implemented AWS-based infrastructure with CI/CD workflows.
 - Achieved **1500+ downloads** and a **4.7 Play Store rating**.

Honors and Awards

- **SSIP Hackathon Winner** – Secured 1st Rank among 2500+ teams in Azadi Ka Amrit Mahotsav Hackathon 2022 and won a **Rs.50,000** cash prize.
- **TCS AI Friday Hackathon Winner** – Built a GenAI-powered insurance risk assessment solution using RAG pipelines, LLM guardrails, and AI workflows, securing 1st place among 20+ teams.
- **TCS Star of the Month (Sept 2026)** – Recognized for technical leadership and contributions to Project Management functionalities and presales demonstrations.
- **TCS On the Spot Team Award (Jul 2026)** – Recognized for technical contribution to the DigiBOLT solution and PETRONAS client demonstration.
- **Ideathon 2023 - 1st Runner Up** – Secured 1st Runner-Up among 20+ teams for designing an online exam proctoring platform, winning a **Rs.10,000** cash prize.
- **Pitch Perfect - 1st Runner Up** – Secured 1st Runner-Up position among 25+ teams in a business strategy competition organized by IMS Ahmedabad.

Leadership & Volunteer Experience

- Mentor - Smart India Hackathon Team**

Nov 2023 - Dec 2023
- **Guided and mentored** a student team for Smart India Hackathon project development.
 - Supported architecture planning and technical problem-solving that helped the team reach the SIH Grand Finale.

- Web Lead - Google Developer Student Club, GCET**

Jan 2022 - May 2022
- Led development of the college **GDSC website** and coordinated frontend development activities.

Certifications

- Microsoft Certified: Azure AI Engineer Associate

Jul 2025
- Microsoft Certified: Azure AI Fundamentals

Jun 2025
